

PRODUCT INFORMATION: **MOON GLASS**

APPLICATION

Moon Glass is available in triangles, cat's eyes and any field tile size. It can be used in ANY residential or commercial location: interior or exterior, on walls, counters, floors, patios or in swimming pools.

We designed Moon Glass as the perfect compliment to our Beach Glass. Individual Moon Glass pieces are interchangeable with any Beach Glass mosaic of the same size. When coupled in a mosaic pattern, whether a Beach Glass deco, field pattern or medallion, Moon Glass creates absolutely striking plays of color and light. When interchanging Moon Glass with any of our Beach Glass mosaic patterns, simply add the price of the individual Moon Glass pieces to the Beach Glass price.

INSTALLATION

We strongly recommend that you use only a white thin-set recommended by its manufacturer for glass tile. Apart from this, Moon Glass requires little more than standard tile installation. Simply apply the thin-set, smooth out the trowel marks and lay the tile. Moon Glass can be trimmed using any wet-saw with a diamond blade meant for glass or porcelain. Once the thin-set has cured, you can grout as you would normally with ceramic tile.

GROUT

Any color of a polymer-modified sanded grout may be used. Be sure to check the manufacturer's specifications as they apply to your installation. The color of the grout will impart some color to the glass.

UPKEEP

Moon Glass is non-porous. A grout sealer may be used because it will not penetrate the tile. If you desire a more transparent or "wet look," periodically apply any sealer wax for wood floors (such as Trewax™ Gold Label Sealer Wax for Wood Floors). Moon Glass may be cleaned with any standard floor or wall cleaner.

LIGHT

Because Moon Glass refracts light in an extraordinary play of color, we strongly recommend that you light it once it is installed to fully appreciate its beauty.
