

## PRODUCT INFORMATION: *Water & Light Glass Mosaics and Listellos*

### **DESCRIPTION and APPLICATION**

*Water & Light Mosaics* are manufactured in one of the oldest glass plants in America; where during its golden era fabulous art glass was produced for Louis Comfort Tiffany. Available in 13 colors and 3 finishes (clear, frosted, and iridescent), *Water & Light* are a through-color, cast mosaic. Use them in any residential or commercial location: interior or exterior, on walls, counters, floors, in kitchens, baths, swimming pools, spas, or fireplace surrounds.

*Water & Light Mosaics* are sold by the sheet (11 5/8" x 11 5/8") and are 3/8" thick (nominal). There are three styles of bar liners – flat, pencil and petite *Listellos* – to accent the line. All three are available in the same 13 colors and 3 finishes. However, because of their greater thickness, *Water & Light Listellos* have a deeper shade which perfectly compliments our *Water & Light Mosaics*.

Beautiful when used alone, *Water & Light Mosaics* are a perfect compliment to natural stone, ceramic and metal tile. They convey the bright, living qualities of light moving across water. They reflect and refract color wherever installed, creating a unique, artistic feeling. Use lighting to enhance your installation and bring the true living beauty of this product into your home. With light directed from a 45 or 90 degree angle, our iridescent tile comes fully to life. (See page titled Understanding Boyce & Bean's Iridescent Finish).

### **INSTALLATION**

*Water & Light Mosaics* come face-mounted with clear tape. The tape faces up (out) during installation and removes easily once the thin-set has cured. The glue is water soluble, so residue wipes away cleanly.

We recommend that you use only a true-white thin-set mortar. Simply apply the thin-set to your floor or wall, smooth out the trowel marks (*Water & Light Mosaics* are translucent and will show trowel marks) and lay the tile with the tape facing up. *Water & Light Mosaics* can be trimmed using any wet-saw with a diamond blade meant for porcelain or glass tile. Nippers also may be used when cutting in. Grout as you normally would with ceramic tile. (See complete installation instructions, which are included with every order.)

### **GROUT**

Any color polymer-modified sanded grout may be used. Be sure to check the manufacturer's specifications as they apply to your installation. Because *Water & Light Mosaics* are translucent, the color of the grout will impart some color to the glass. A grout sealer should be used to finish the job. Follow the manufacturer's instructions for use of their product.

### **UPKEEP**

*Water & Light Mosaics* are non-porous and may be cleaned with soap and water or a non-abrasive, non-corrosive cleaner (e.g., Windex™, Fantastic™, all-purpose citrus cleaner) applied with a standard, kitchen Scotchbrite™ sponge.
